This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 967051.

# Scope of Action

The RoundBaltic project follows a cyclic approach due to the overall objective of creating a framework and a momentum for energy efficiency investments in the direct target countries Poland, Latvia and Denmark.

RoundBaltic bring together representatives of the financial and energy efficiency sectors at roundtables to discuss and find solutions to the challenge of energy efficiency finance. Key focus areas are how to ensure an investment friendly framework along designing of financing instruments in accordance with the EU financial pillars more effective use of public funds, aggregation and project development assistance and de-risking.

In dialogue with the stakeholders the intention is to foster ideas and recommendations for specific actions to bring investment momentum. The implementation of these actions will go along efforts to improve the investment framework, adopting tools for market development and learning of the performed activities for future actions.

*This effort will link to the Sustainable Energy Investment Forums initiative of supporting investment momentum in the EU.*

## Investment framework

- Analysis of needs & opportunities
- Developing tools for market operations
- Establishing stakeholder forums
- Intervention plan for the project activities in each target country

## Evaluation and exchange

- Learning of the performed activities for future actions
- Exchange within and across the countries and regions
- Refining the intervention strategies according to the lessons learned

## Roundtables

- Bringing stakeholders together across the energy efficiency and financial sector
- Discussion on key topics
- Making ideas and recommendations for actions to give investment momentum

## Enabling actions

- Follow-up of the ideas and recommendations of the roundtables
- Typical actions may include putting in place one-stop-shops and other investment oriented initiatives
- This goes hand in hand with efforts to improve the investment framework and using tools for market development
